Installation:

STEP 1: Install Python

Action:

1. Go to **python.org**
2. Download **Python 3 (latest version)**
3. Run the installer
4. ✅ **IMPORTANT**: Check **"Add Python to PATH"**
5. Click **Install Now**

Check Output:

Open **Command Prompt** and type:

python --version

Output:

Python 3.x.x

STEP 2: Install Visual Studio Code (VS Code)

Action:

1. Go to **code.visualstudio.com**
2. Download and install VS Code
3. Open VS Code

STEP 3: Install Python Extension in VS Code

Action:

1. Open VS Code
2. Click **Extensions** (left side)
3. Search **Python**
4. Install **Python (by Microsoft)**

Output:

✅ Python support enabled in VS Code

STEP 4: Create a Project Folder

Action:

1. Go to **Desktop**
2. Create a new folder
3. Name it:

Django_project

STEP 5: Open Project Folder in VS Code

Action:

1. Open VS Code
2. Click **File → Open Folder**
3. Select **Django_project**

STEP 6: Open Terminal in VS Code

Action:

1. Click **Terminal → New Terminal**

Output:

PS C:\Users\YourName\Desktop\Django_project>

STEP 7: Create Virtual Environment

Action:

Type:

python -m venv venv

Output:

(no error message)

📁 A folder named venv is created.

STEP 8: Activate Virtual Environment

Action:

venv\Scripts\activate

Output:

(venv) PS C:\Users\YourName\Desktop\Django_project>

STEP 9: Install Django Framework

Action:

pip install django

Output:

Successfully installed django

STEP 10: Check Django Installation

Action:

django-admin --version

Output:

6.0

STEP 11: Create Django Project

Action:

django-admin startproject mysite

Output:

📁 New folder created:

mysite

STEP 12: Go Inside Project Folder

Action:

cd mysite

Output:

(venv) PS ...\Django_project\mysite>

STEP 13: Apply Database Migrations

Action:

python manage.py migrate

Output:

Applying migrations...
OK

STEP 14: Run Django Development Server

Action:

python manage.py runserver

Output:

Starting development server at http://127.0.0.1:8000/

STEP 15: Open Django in Browser

Action:

Open browser and go to:

http://127.0.0.1:8000/

Output:

The install worked successfully! Congratulations!

📂 Final Project Structure

```
Django_project
│
├── venv
└── mysite
    ├── manage.py
    └── mysite
        ├── settings.py
        ├── urls.py
```

```
└── wsgi.py
```

✅ Conclusion

- Python installed ✓
- VS Code installed ✓
- Django installed ✓
- Server running ✓
